AUTOMOTIVE DIAGNOSIS & ANALYSIS SYSTEM

Automotive diagnosis & analysis system

Strumenti per diagnosi rapide e professionali

La linea MaxiSys è la linea di strumenti di diagnosi AUTEL più tecnologica e avanzata con cui si possono eseguire codifiche sicure e attendibili. Gli strumenti MaxiSys sono in grado di eseguire procedure a livello di ECU, funzioni di livello OE, service TPMS integrato e connettività Bluetooth wireless potenziata per agevolare i movimenti attorno al veicolo durante la diagnosi.

La Linea MaxiSys include un Wi-Fi avanzato dual band (2.4 GHz e 5ghZ) due volte più rapido rispetto ai sistemi diagnostici di precedente generazione. L'interfaccia di comunicazione veicolo (VCI) si connette al tablet tramite sistema Bluetooth Long-Range Classe1.

Una volta che la VCI wireless è connessa all'auto, il tecnico è completamente libero di spostarsi per tutta l'officina mantenendo

il collegamento con il veicolo.

La sua connettività wireless permette inoltre di effettuare gli aggiornamenti alle versioni software più recenti con una migliore copertura dei veicoli e delle funzioni.

Tutto ciò permette al meccanico di fornire un servizio completo ai propri clienti, in piena autonomia.

MAXIDAS 808

PART N. MS808BT

Based on the Android operating system, MaxiDas DS808 is featured with an extensive coverage of OE-level diagnostics. Installed with a fast quad-core processor, DS808 offers maximum convenience and efficiency for your diagnosis and analysis. The intuitive user interface makes using the device effortless through a 7-inch LCD touchscreen that displays at 1024 x 600 quality.

TECHNICAL SPECIFICATIONS

Processor	Cortex-A9 processor (1.5 GHz)
Operating system	Android™ 4.4.2, KitKat
Memory	32GB
Battery	5000 mAh
Display	7 inches, 1024x600
