The MaxiSys line is **AUTEL**'s most technological advanced line of diagnostic tools, which allows for safe and reliable coding.

MaxiSys tools are capable of ECU-level procedures, OE-level functions, integrated TPMS service and enhanced wireless Bluethoot connectivity to facilitate movement around the vehicle during the diagnosis.

The MaxiSys line includes **advanced dual band Wi-Fi (2.4 GHz and 5 ghZ)** twice as fast as previous generation diagnostic systems.

The vehicle communication interface (VCI) connects to the tablet via the Bluethooth Class 1 Long Range system.
Once the wireless VCI is connected to the car, **the technician is completely free to move around the workshop** while maintaining the connection with the vehicle.
Moreover, its wireless connectivity allows for updates to the latest software versions with better vehicle and feature coverage.

All this allows the technician to provide a complete service to his customers, in full autonomy.

MAXISYS ULTRA

PART N. MS906ULTRA

The MaxiSys Ultra is Autel's most ambitious diagnostics tablet designed to maximize technician performance.

It features a 12.9-inch touchscreen tablet with Android 7.0 OS, substantial 256 GB built-in memory, all powering the new split-screen multi-application navigation. Combined with the dynamic topology mapping, enhanced AutoSCAN features and Intelligent Diagnostics options, the Ultra offers the technicians step-by-step repair guidance.

The new MaxiFlash VCMI functions as a 4-channel oscilloscope, waveform generator, multimeter, and CAN BUS tester. The convenient docking station featured ensures you always have the power to scan.

Vehicle interface included.
The tool is sold with the cable case on page 26.

MAXISYS 919

PART N. MS919

The MaxiSys MS919 features a 9.7-inch touchscreen tablet with Android 7.0 OS and a substantial 128GB built-in memory.

The new MaxiFlash VCMI functions as a 4-channel oscilloscope, waveform generator, multimeter, and CAN BUS tester.

The supporting MS919 software provides a large library of preset guided tests and extensive waveform library, to ensure techs are getting the most Oscilloscope use.

The MS919 software outperforms competitors by offering DTC and sensor specific test options to help test more accurately, as well as providing probe and component location diagrams.

Vehicle VCMI included.
The tool is sold with the cable case on page 25.

MAXISYS ELITE

PART N. MSELITE

The MaxiSys Elite, the newest addition to the MaxiSys line of highly advanced smart diagnostic tools, is based on the fast and intuitive Android operating system.

Powered by NVIDIA's Tegra® 4, the world's fastest mobile processor, its visually stunning 9.7" Retina display offers ultra-high resolutions up to 2048x1536 and an optimized array of sophisticated and powerful applications. The MaxiSys Elite rapidly performs every job from comprehensive vehicle diagnostics & analysis to advanced ECU programming. 2x faster than any comparable device, the MaxiSys Elite provides extended battery life and intelligent power saving. The MaxiSys Elite offers a super-sensitive capacitive screen able to respond to gloved, moistened, and even greasy fingers! The ergonomically angled docking station provides optimum visibility and convenient charging that eliminates power concerns.

J2534 ECU Programming Device

MAXISYS 908 S PRO

PART N. MS908PRO

The MS908S PRO is based on the revolutionary Android multitasking operating system, utilizes the powerful Cortex A7+A15 six-core processor, and equips with 9.7-inch LED capacitive touch screen.

Supporting J2534 ECU Programming Device, is capable of replacing the existing software/firmware in the Electronic Control Units (ECU), programming new ECUs and fixing software-controlled drivability issues and emission issues. The MS908S PRO is an ideal tool for easy and efficient professional diagnostics.

Vehicle interface included.
The tool is sold with the cable case on page 22.

PART N. 23VCIPR

MAXIFLASH ELITE J2534

A VCI is an interface which allows communication with the control units (ECU). Being compliant with SAE J2534 1 and 2, through OEM software* it is possible to carry out ECU programming and updates of vehicles, which are useful for correcting operating and driveability problems in software. It performs the PassThru J2534 standard function and ensures advanced programming and diagnostic performance.

***Requirements: to access the OEM portals it is necessary to have a subscription and a correctly configured PC. These are not included.**
